Unique items to enhance your lake house lifestyle.

3D Lake Art

CUT FROM RUSSIAN BIRCH WOOD, framed and under glass, these stunningly beautiful 3D laser-carved lake maps will become the focal point of any lake home, cabin or cottage. They offer an easy way to explain the topography of your lake to weekend guests as well as quickly answer the inevitable question, "Where is your house located?" They also make a unique gift for anyone who enjoys the lake house lifestyle.

Each Bathymetric (underwater) map is created using state fish and wildlife, DNR or navigation maps to accurately depict the underwater contours and surrounding shoreline details of a lake or river. Search for your body of water by state/province, county and name using our online selection tool. More than 4,000 U.S. and Canadian lakes are available, with new lakes being added every day. If your lake is not listed, please complete the submission form, and we will research its availability.

For each 3D lake map, the laser cuts completely through the wood, resulting in a "jigsaw" of pieces that are then reassembled, creating a map that is up to eight layers deep. 2D maps are also available, depicting the surrounding shoreline on one level, with the bottom contours etched into the wood.

Lake maps also can be etched onto a variety of attractive home décor pieces, making a unique statement or a personalized gift. Visit our website to see the full range of customized possibilities..

ALL ITEMS ARE MADE IN AMERICA.

Each item is individually made, so please allow approximately two weeks for production. These are very popular lake gifts, so please plan ahead during the holiday rush; the cutoff for guaranteed Christmas delivery is traditionally the latter part of November.

FRAMED 2D ART is available in 8x10 and 16x20 inch sizes.

FRAMED 3D ART is available in three sizes: 16x20, 24x30 and a stunning 36x48 (inches).

All items shipped directly to you, from our very crafty crafters.

Home Accents & Gifts

FANCY THAT! A wine rack made out of a water ski. A fishing lure chalkboard. Who knew there were such things? We've rounded up all kinds of unusual, handy and fun lake-themed items to give your lake house character or to give to your lake-loving friends.

Dip bowls for your home-made smoked fish dip; or whatever.

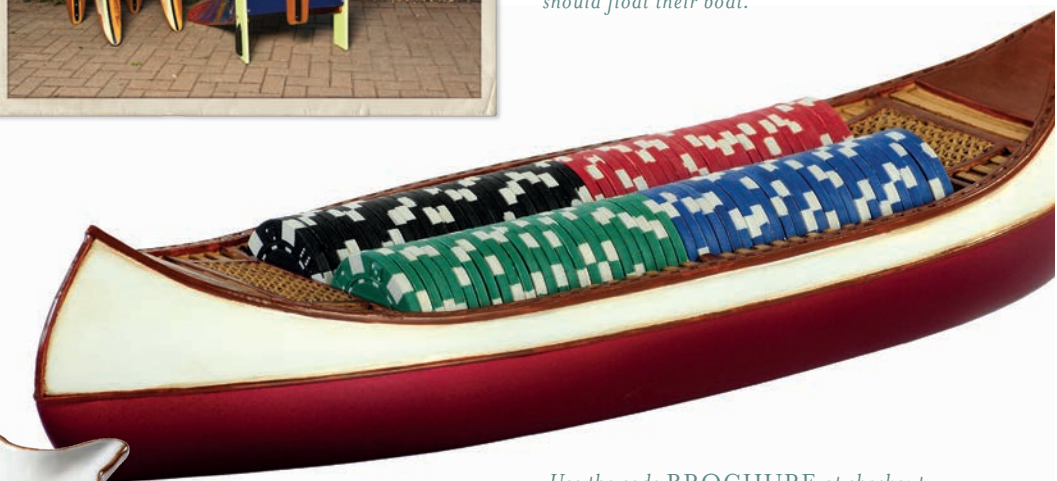

Fish-shaped dishes and colorful fish luminaries are the catch of the day. (Bad pun intended.)

Beverages just taste better when they come from a rowboat ice bucket. Is it 5 o'clock yet? (And does it matter what time it is when you're at the lake?)

A poker game in a canoe — that should float their boat.

Use the code BROCHURE at checkout and receive 5% OFF of your order. Because we're nice like that!
